DETAILED ACTION

Specification

1. A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.
3. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claims 1, 3, 4 – 11, 14, 16, 18, 19, 21, 23, and 25, drawn to an integrated sensor system.

Group II claims 2, 12, 13, 15, 17, 20, 22, and 24, drawn to integrated sensor system.

5. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

6. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I, specifically Claim 1, claims a detection unit with an organic

Art Unit: 2858

membrane capable of detecting a characteristic of a gas or liquid. Alternatively, Group II, specifically Claim 2, claims a detection unit that comprises an ion sensible FET for measuring pH concentration in an aqueous solution. The subcombination has separate utility such as being able to measure the pH concentration of an aqueous solution, while the invention of Group 1 is capable of detecting a of a gas or liquid comprising a substance to be measured, such impurities in drinking water.

7. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group 1, restriction for examination purposes as indicated is proper.
